## Profile Summary

Motivated and detail-oriented Python Developer with a strong foundation in Python, object-oriented programming, data structures, algorithms, and SQL. Familiar with Django, REST APIs, HTML, CSS, JavaScript, and React. Passionate about building scalable web applications and eager to contribute to a collaborative team while continuously learning and growing as a software developer.

## Professional Skill

- HTML
- CSS
- JavaScript(ES6+)
- REACT
- REST API
- PYTHON
- Django
- MySQL
- Git&GitHub

## Education

### Bachelor of Computer Science and Engineering (2022-2026)

Fatima Michael College of Engineering and Technology | CGPA : 8.0

## Work Experience

### Internship

#### Python Full Stack Developer Intern

##### Periyanchi Hitech Solution | Currently

- Developed full-stack web applications using Python, Django, HTML, CSS, JavaScript, and React.
- Built and integrated REST APIs with Django and connected them to React-based user interfaces.
- Designed and managed MySQL databases, including CRUD operations and data validation.
- Tested, debugged, and optimized applications while following Git-based version control and coding best practices.
- Leveraged modern AI tools (Chat, Gemini, NotebookLM, DeepSeek, Grok) and advanced agentic tools (AntiGravity, Codex, Kiro) to accelerate development, automate testing, and streamline debugging workflows.

**Skills:** Python, Django, React, REST API, MySQL, HTML5, CSS3, JavaScript, Git, GitHub, Gemini, DeepSeek, Grok, NotebookLM, AntiGravity, Codex, Kiro

#### Frontend Development Intern

##### Pantech ProEd    Duration: 1 Month. 2024

- Developed responsive web pages using HTML5, CSS3, and JavaScript.
- Built interactive user interfaces with responsive design and DOM manipulation.
- Implemented client-side form validation and modern layouts using Flexbox and CSS Grid.
- Tested, debugged, and optimized web applications while following coding best practices.

**Skills:** HTML5, CSS3, JavaScript, Responsive Web Design, DOM Manipulation, Git.

## Project

### Portfolio Website | HTML, CSS, JavaScript( 2024)

- Developed a responsive portfolio website with a login page featuring username/password authentication and client-side navigation to the home page.

### Lung Cancer Prediction | Python, Pandas, Scikit-learn( 2023)

- Built a machine learning model to predict lung cancer risk using demographic, lifestyle, genetic, and clinical data with data preprocessing and model evaluation.

### Automated Plant Species Classification | Python, TensorFlow, OpenCV(2023)

- Developed a CNN-based image classification system for plant species identification using image preprocessing, data augmentation, and deep learning techniques.

## Certification

- Basics of Python - Infosys Springboard
- Python Essentials 1 - Cisco Networking Academy
- Python Course for Beginners - Scalar
- Full Stack Development - Pantech ProEd Pvt lfd.
- Frony End Development (HTML ) - Great Learning
